Preface

In accordance with Statistical Law of Afghanistan, National Statistics and Information Authority (NSIA) is mandated to collect, compile, analyze and disseminate statistical data in the country. NSIA has always tried to collect up-to-date data and information from data sources, through conducting of surveys and data collection activities, and publish the results in statistical publication for the use of policy makers, planners and other users involved in economic affairs, for design, preparation of evidence based development plans, streamlining and evaluation of activities.

NSIA takes the pleasure to publish the publication of Quarterly Statistical Indicators Third Quarter of 2019 in line with its other publications, so that data users have access to statistical data during the year.

The publication of Quarterly Statistical Indicators of Third Quarter 2019 includes major indicators such as Government Employee, Higher Education, Health Facilities, Agriculture, Industries, Mining, Construction, Electricity, Revenue and Expenditure of Public Enterprises and Companies, Development Projects, Transportation, Communication, Foreign Trade, National Consumer Price Index and Gross Domestic Product which is compared to the data of Third Quarter of 2018 which not only provides an overall picture of socio-economic progress, but also reveals shortcoming in the mentioned areas, so that the responsible authorities, based on them and considering current challenges, document their future plans and identify vulnerable areas and take measures to remove them.

Here by, All data Users, Planners, Policy formulators, Academicians and Researchers are humbly urged to share their constructive ideas and critics for better improvement of NSIA publications.

Mining

Afghanistan is rich in mineral resources and offers potential for considerable future development. Coal, natural gas, salt, marble, liquid ammonia has been commercially exploited in the past. There are deposits of iron, barites, and significant reserves of copper and some oil reserves. Total value of mining production in fourth quarter of 2019 decreased by 17.63 % compared to fourth quarter 2018.

Electricity

Electricity production in the country is being produced by hydro, diesel, and thermal powers. Afghanistan has potentially a rich resource of hydroelectric. In the third quarter of 2019 electricity production increased by 20.98 % compared to third quarter 2018.
